## Summary of Qualifications

I have hands-on experience as a System Administrator (Project Consultant) at TVS Credit Services. Day by day, I contribute to improving and securing the company's IT environment. I'm also continuously growing my skills across the entire IT infrastructure workflow — from end-user support to organizational security enhancements. I have working knowledge in areas such as IT Governance, ISO 27001 audits, SIEM tools, team management, SLA adherence, and Just-In-Time (JIT)

## Skills

- SIEM & Security Tools : Forcepoint, Netskope, Microsoft Defender for Endpoint, Site24x7
- Cloud Platforms & Infrastructure : Oracle, VMware ESXi, Palo Alto Networks, ManageEngine, SSO solutions
- Scripting & Programming : Python, Shell scripting; familiar with AI/ML concepts and LLMs
- Operating Systems : Windows, Linux (Ubuntu), macOS
- My Mission & Mindset : Start.me  Want to know more about me? Click 'Start Me' (or) Scan.

## TVS Credit Services (Project Consultant) 3+ years
Jul 2022 — Present

### System Engineer Trainee

Technical Support for End Users: Addressing and resolving technical issues, ensuring smooth and efficient system operations. Responsible for following IT protocols while managing DMR and NVR systems, monitoring application performance, utilizing Oracle ticketing tools, performing software installations, and configuring printers.

### System Security Engineer

To be an effective System Administrator, it's important to secure the infrastructure by properly educating users and clearly explaining IT policies on a daily basis. This includes not just technical solutions, but also basic user-level practices to maintain a secure environment.

I have experience in identifying and troubleshooting issues across the entire IT infrastructure

including application-level problems, server installations, configurations, and deployment support

I'm skilled in configuring, migrating, and deploying SIEM tools to enhance security .

Involved in business-level development and implementation of third-party software, including gathering requirements, testing applications, and ensuring successful deployment.

### Project work

ManageEngine Implementation: Deployed and configured ManageEngine for automated patch updates and compliance management across endpoints.

Cloud Platform (Oracle): Led data migration from on-premises servers to Oracle Cloud, including setting up and configuring virtual machines for seamless operations.

SSO (Single Sign-On): Implemented and integrated SSO across all critical applications to ensure secure and centralized authentication for users
